

Line Filament Lamps

Line filament lamps are designed for applications where a thin line of uniform light is required and where space is limited. Typical uses include edge and backlighting LCD displays, emergency lighting systems, scanners and other specialty illumination. Gilway Technical lamp offers line filament lamps ranging from 4.8mm to 89mm in length, and 1mm to 5mm in diameter. These lamps have long life, a typical color temperature of 2000°K, and are available with wire lead or capped ends.
