### ILT Introduces New Lamp Power Supplies Product Line

New Linear Power Supplies Nicely Complements ILT's Specialty Lamp Products

Peabody, MA – International Light Technologies (ILT), a leading designer, manufacturer and distributor of specialty light sources and light measurement and detection systems, is pleased to announce the introduction of the ILT Lamp Power Supplies product line.

The new line of ILT power supplies are all highly-regulated, low noise and ripple variable DC power supplies. These highly stable, high quality bench power supplies have continuously adjustable output and come in three different voltage / current ranges to suit your specific application.

The product line consists of 3 different power supplies designed to meet the lamp testing needs of all of ILT's many lamp customers.

- 45W Lamp Power Supply - DC power supply with output continuously adjustable at 0-15V DC and 0-3A
- 150W Lamp Power Supply - DC power supply with output continuously adjustable at 0-30V DC and 0-5A
- 300W Lamp Power Supply - DC power supply with output continuously adjustable at 0-30V DC and 0-10A

All are equipped with coarse and fine controls for adjusting the voltage and current outputs, making it extremely easy to set the output to your desired level. They come with 2 backlit LCD displays providing accurate readout for the voltage and current values.

"ILT had numerous requests from our specialty lamp customers to add a line of high quality lamp power supplies to our product offering", Thom Connolly, ILT's President, said about ILT's new lamp power supply products. "We know our customers will be very pleased with the performance and quality of these new ILT Lamp Power Supplies."
